

MedBot Installation Guide

Download Python 3.10+

Download Git

✓ 1. Clone Repository

Open Terminal, PowerShell, or Command Prompt:

```
gh repo clone helloAllyj/medbot
```

```
cd medbot
```

or

Open Visual Studio Code:

Select Clone Git Repository

Enter : <https://github.com/helloAllyj/medbot.git>

✓ 2. Set Up Virtual Environment

Create a virtual environment (only once):

```
python -m venv venv
```

Activate it:

Windows

```
venv\Scripts\activate
```

macOS & Linux

```
source venv/bin/activate
```

✓ 3. Install Required Libraries

Install everything from requirements.txt:

```
pip install -r requirements.txt
```

```
pip install requests
```

✓ 4. Run the App

While your virtual environment is active:

```
python app.py
```
